

Fab Lab Tulsa hosts Business Summit

Fab Lab Tulsa is hosting a business summit on Monday March 29 at Circle Cinema in historic Whittier square near 1st and Lewis. There will be two information and discussion sessions running from 4:00 to 4:45pm and from 5:00 to 5:45pm. Free drinks and appetizers will be served.

The business summit is intended for all businesses with an interest in Fab Lab Tulsa, but with a specific emphasis on small engineering firms, laboratories, patent attorneys and inventors.

Tulsa's Fab Lab will have private conference and office space available for businesses to entertain clients, conduct negotiations or discuss proprietary information.

Fab Lab Tulsa is an open access rapid prototyping and manufacturing space outfitted with two and three axis CNC machines, a laser cutter, a 3D printer, a vinyl cutter and electronic circuit building equipment. MIT provides the machines and software for the lab. All 35 labs around the world are networked with each other via video so that users from across the globe can interact and learn.

The business summit will explain the benefits of Fab Lab Tulsa and outline how businesses can become involved either through free public access or exclusive membership privileges.

Examples of how businesses can be involved include encouraging their employees to be mentors for engineering, manufacturing, inventing or entrepreneurship. Or businesses can provide financial sponsorship through three levels of membership; with each level having different benefits. Corporate or individual memberships will be discussed and questions from businesses will be addressed.

Mark your calendars. See our website at www.fablabtulsa.com for more information. RSVPs are requested but not required.

Join us for a fun evening to learn about Fab Lab.
